Introduction

The West Virginia College- and Career- Readiness Standards (WVCCRS) ~~WVCCRS~~ have been developed with the goal of preparing students for a wide range of high-quality postsecondary opportunities. Specifically, college- and career-readiness refers to the knowledge, skills, and dispositions needed to be successful in higher education and/or training that lead to gainful employment. The WVCCRS establish a set of knowledge and skills that all individuals need to transition into higher education or the workplace, as both realms share many expectations. All students throughout their educational experience, should develop a full understanding of the career opportunities available, the education necessary to be successful in their chosen pathway, and a plan to attain their goals.

WVCCRS for the Arts promote proficiency in performing a range of material or creating two- or three-dimensional artworks, analyzing and processing feedback, the application of verbal and non-verbal communication, and integrity in responsible collaboration with peers. Students will develop problem solving and critical thinking skills independently and collaboratively as they engage in the common domains of the ~~arts~~ Arts – create, connect, explore, perform, relate, respond, and others germane to specific arts disciplines. College- and career-readiness is supported in the arts as students acquire and further develop abilities to become creators, consumers and advocates of the arts.

~~Committees of educators from across the state convened to revise the standards. The overarching goal was to build rigorous, relevant, and challenging arts education programming that would prepare students for college and career readiness. West Virginia educators and representatives from higher education institutions played a key role in shaping the standards to align with research and best practice in the field of arts education. The contribution of these professionals was critical in creating a policy that is meaningful to classroom teachers and appears in a format that can easily be used and understood.~~

Explanation of Terms

Domains are the broad components that make up a content area, e.g., create, connect, explore, perform, relate, and respond are domains found in all arts disciplines.

Create - In the arts, to create is to generate, conceptualize, and express artistic ideas and work. It can include a performance, a composition, and/or a two- and three- dimensional piece of art.

Connect - In the arts, to connect is to synthesize and relate knowledge and experiences to make art. It can include relating artistic ideas and works with societal, cultural, and historical context to deepen understanding.

Explore - In the arts, to explore is to study, analyze, experience, describe and interpret arts disciplines.

Perform - In the arts, to perform is to interpret, develop and refine artistic ideas and works for presentation and study. It can include individual and group efforts.

Relate - In the arts, to relate is to understand the relationship of a single arts discipline to other arts disciplines, other disciplines outside the arts, and to a variety of cultures and historical periods.

Respond - In the arts, to respond is to perceive, interpret, and analyze artistic work, giving it meaning. It can include applying criteria to evaluate artistic work.

~~Others~~ Other domains specific to theatre and visual art are: Theatre - scriptwriting, acting, technical theatre, directing, and Visual Art – media, techniques and processes, elements of art and principles of design, subject matter, symbols, and Ideas, art history, ~~and diversity~~, reflection, ~~and~~ analysis, and multi-disciplinary connections. These content-specific domains are featured in chart form at the beginning of standards in which they appear.

Standards are the expectations for what students should know, understand, and be able to do; standards represent educational goals.

Numbering of Standards

The numbering for each standard is composed of three or four parts, each part separated by a period:

- the content area code (e.g., MU for Music).
- the grade level or high school content area,
- the course level (when applicable), and
- the standard.

Illustration: MU.K-2.1 refers to General Music, grades K-2, standard 1
MU.B.3.22 refers to Band, level III, standard 22.

Abbreviations:

MU – Music

VA – Visual Art

DA - Dance

TH – Theatre

The following four arts disciplines are:

Music education

Music education provides students with opportunities to explore the world of music through singing, playing instruments, moving, and listening, and to develop skills to perform, create, and appreciate music. Civic literacy is developed in music education through the study of patriotic and folk music. In addition, global awareness will be introduced to the student through experiencing the music of other cultures. Collaboration skills will be emphasized as students learn to perform with others in various ensembles. Critical-thinking skills will be sharpened as students actively listen and respond to what they hear. Creativity and problem-solving skills will be developed through simple composition and improvisation. Students will relate music to other disciplines, including literature, math, science, and visual art.

Visual Art education

The study of visual art provides students with the skills to appreciate and create ~~and~~ visual art. In visual art, students explore the world of art through subject matter that centers on the student's own environment, allowing them to express feelings and ideas using a variety of media and tools. Communication skills are developed as students discover how to communicate through art and to discuss their own creations. Technical expertise is honed as they learn to use tools properly for drawing, painting, printing, and sculpture. As they develop their artistic sensibilities, students will build upon their knowledge of the elements and principles of visual art to investigate more complex concepts of artistic design. Civic literacy is developed as subject matter expands from personal to the community, environment, nature, and other cultures, and as an understanding of connections between the arts and other disciplines is formed.

Dance education

The study of dance provides students with the skills to perform, create, and appreciate dance. Students will experience a variety of dance concepts, ideas, and techniques. Advancing personal knowledge of a variety of dance concepts, ideas, and techniques, allows students to develop as dance artists. In dance education, students evaluate personal actions, commitment, and discipline necessary to achieve dance goals while discovering an individual voice as an artist performer. Health literacy is developed as students identify strategies and approaches which can ensure the health and care of the dancer's instrument (body). Civic literacy is developed as students explore the influence of culture, historical period, and context on the creation and interpretation of dance.

Theatre education

The study of theatre provides students with the skills to perform, create, and appreciate theatre. In theatre, students study, adapt, and create stories for performance; identify contemporary styles of theatre/drama and depict characters in them; identify elements of technical theatre; and demonstrate technical theatre knowledge and skills. Communication and collaboration skills are developed as students discuss multiple interpretations for production ideas and collaborate to uncover how the non-dramatic art forms enhance a theatre production. Through exploration of diverse texts, students will study the influence of culture, historical period, and context on the creation and interpretation of theatre.

General Music - Grades K-8

The sequential program of music study will include, but is not be limited to, general music instruction for kindergarten through eighth grade. Sufficient time should be allotted for students to achieve the General Music Standards. A quality music program brings richness to the school curriculum; therefore, it is recommended that schools provide more than a sufficient amount of time for the delivery of the music curriculum. The standards are written to maximize teacher flexibility and creativity in delivering quality music instruction to all students.

ANCILLARY

Ancillary Standards provide opportunities for students in grades K-12 to experience making and creating music beyond the traditional choral, instrumental, and string electives. Opportunities prevail to provide instruction in specific instruments or the creation of ensembles which can be characteristic of cultures, genres, and styles. Previous standards in piano and guitar provided a blueprint for these ancillary standards.

A variety of non-traditional ensembles having a proprietary definition can surface. These are called X-Ensembles. Examples of X-Ensembles include, but are not limited to: rock band, steel band, handbells, percussion ensembles, Orff ensembles, ukulele ensembles, mariachi band, bluegrass band, ~~technology based ensembles~~, strolling strings, ~~and~~ world music, and ethnic music ensembles.

The Ancillary Standards include Guitar, Piano, and X-ensembles.
