

SDI Planning Template

Complete the template below for your assigned case study:

- | | |
|---|--|
| ☐ 1. Identify the learning goal | ☐ 4. Select an SDI strategy |
| ☐ 2. Determine the student learning need | ☐ 5. Determine a plan for progress monitoring |
| ☐ 3. Identify the skill to teach | ☐ 6. Plan instructional delivery |

Step	Response	Response
Learning Goal	What is the grade-level standard or learning target? What does success look like?	
Learning Need	What specific skill or process is interfering with the student's ability to meet the learning goal? (Avoid naming the disability, focus on the skill.)	
Skill to Teach	What skill must be explicitly taught for the student to access the learning goal?	
SDI Strategy	Which SDI strategy will explicitly teach this skill? How will the teacher model and guide the learning?	
Delivery	Who will deliver the SDI, when during the lesson, and in what setting?	
Progress Monitoring	How will we know the student is improving? What will we measure? How often?	

Final Check:

- | | |
|---|--|
| ☐ Does the skill directly address the learning need? | ☐ Does the strategy explicitly teach the skill? |
| ☐ Is this instruction (not just support or accommodation)? | |
