Executive Summary

This report describes the occurrence of discipline referrals and corresponding interventions and consequences used by schools for harassment, intimidation, or bullying behaviors during the 2015-2016 school year.

Method of study. Using data entered into the West Virginia Education Information System (WVEIS), we conducted two sets of analyses—one focusing on discipline referrals to examine the number, seriousness, and types of harassment, intimidation, or bullying behaviors and interventions used by schools; and a second addressing questions about the characteristics of students reported for these behaviors.

Findings. Of the 240,387 student discipline referrals reported in WVEIS and useable for this report, 3,507 (1.5%) were for harassment, intimidation, or bullying behaviors. Most of these referrals were at the middle school level (47%) followed by high school (32%) and elementary school (20%). WV Code §18-2C requires the reporting of the reasons, if known, for harassment, intimidation, or bullying behaviors. The reason reported for 61% of these behaviors was “other characteristic,” suggesting they were not definitively known. Other reported reasons were physical appearance (10%), gender (6%), mental/physical/developmental/sensory disability (6%), or sexual orientation (5.5%).

Students referred for harassment, intimidation, or bullying behaviors also were referred for other categories of inappropriate behaviors, including disruptive/disrespectful conduct (50%), failure to obey rules/authority (27%), tardiness or truancy (11%), and aggressive conduct (10%). The main disciplinary interventions or consequences used by schools in response to harassment, intimidation, or bullying behaviors included out-of-school suspensions (35%), followed by in-school suspensions (19%), detentions (11%), and administrator/teacher and student conferences (11%). All other interventions or consequences were used at lower rates.

Of the 2,936 students referred for disciplinary action for harassment, intimidation, or bullying behaviors, most (86%) were referred for a single offense. Nearly three quarters of the students were male. White students were referred at a slightly lower rate than their respective statewide representation (85% vs. 91%), while Black students were referred at a higher rate (11% vs. 5%). Other races made up roughly the same proportions as their representation in the overall student population. More than a quarter (27%) of students referred for these behaviors were identified as eligible for special education services. Risk ratio calculations indicate Black students were 2.5 times as likely to experience discipline referrals for these behaviors compared to White students. Similarly, students with disabilities were twice as likely to be referred compared with students without disabilities.

Limitations of study. Findings are dependent on the completeness and accuracy of data submitted by schools and certified as accurate by districts. There was evidence of nonreporting and underreporting. Discipline referrals are reported at the discretion of local school staff. Although a prescribed coding scheme with behavior descriptions has been provided, it is subject to variation in interpretation and usage.

Suggested best practices. Based on the findings of the study, several best practices are suggested: (a) address harassment, intimidation, or bullying behaviors with evidence-based interventions integrated into a school-wide approach aimed at improving behaviors and overall
conditions for learning; (b) build staff capacity to provide appropriate behavioral interventions in the context of a multi-tiered framework as part of school-wide approaches to promote appropriate behavior; (c) minimize the use of out-of-school suspensions and couple in-school suspensions with interventions to avoid depriving students of needed supports; and (d) investigate the issue of subgroup disparity in discipline practices and deliver professional development and technical assistance to schools to help minimize disparities.
Introduction

In accordance with legislative reporting requirements set forth in WV Code §18-2C-3, the purpose of this report is to describe the occurrence of discipline referrals and corresponding interventions and consequences used by schools for harassment, intimidation, or bullying behaviors during the 2015-2016 school year. Cross tabulations are provided by student grade and demographic characteristics.

Context

Bullying and related behaviors are of increasing concern, both in the school environment and on a broader scale in the communities that schools serve. Findings from the 2015 Youth Risk Behavior Surveillance (YRBS) survey indicated that about 24% of 9th- through 12th-grade students and about 52% of 6th- through 8th-grade students in West Virginia reported having been bullied on school property in the 12 months prior to the survey. Additionally, 20% of high school students and 29% of middle school students reported having been electronically bullied in the 12 months prior to the surveys. Combined, these rates add to an ever increasing concern about these behaviors as they relate to the health and well-being of West Virginia’s youths.

In 2011, the West Virginia Legislature sought to clarify and ensure consistency in addressing these behaviors across the state’s education system by requiring county boards of education to establish policies prohibiting harassment, intimidation, or bullying (WV Code §18-2C-3). In doing so it provided the following definition:

“…harassment, intimidation or bullying” means any intentional gesture, or any intentional electronic, written, verbal or physical act, communication, transmission or threat that:

(1) A reasonable person under the circumstances should know will have the effect of any one or more of the following:
   (A) Physically harming a student;
   (B) Damaging a student's property;
   (C) Placing a student in reasonable fear of harm to his or her person; or
   (D) Placing a student in reasonable fear of damage to his or her property;

(2) Is sufficiently severe, persistent or pervasive that it creates an intimidating, threatening or emotionally abusive educational environment for a student; or

(3) Disrupts or interferes with the orderly operation of the school

The statute also required the recording of “…the means of harassment, intimidation or bullying that have been reported…, and the reasons therefore, if known.”

By this definition, harassment, intimidation, or bullying are treated collectively. Although similar, in practice they may not be the same. Depending on the particular circumstances and function of the behaviors, they also may differ in terms of the interventions that may be appropriate or necessary. According to a federal government website managed by the U.S. Department of Health & Human Services (www.stopbullying.gov), bullying is defined as
...unwanted, aggressive behavior among school aged children that involves a real or perceived power imbalance. The behavior is repeated, or has the potential to be repeated, over time. Both kids who are bullied and who bully others may have serious, lasting problems.

In order to be considered bullying, the behavior must be aggressive and include:

- An Imbalance of Power: Kids who bully use their power—such as physical strength, access to embarrassing information, or popularity—to control or harm others. Power imbalances can change over time and in different situations, even if they involve the same people.

- Repetition: Bullying behaviors happen more than once or have the potential to happen more than once.

Bullying includes actions such as making threats, spreading rumors, attacking someone physically or verbally, and excluding someone from a group on purpose. (U.S. Department of Health & Human Services, n.d.)

Also according to the federal definition, bullying and harassment are not the same. For example, it is possible for harassment to occur in the absence of an imbalance of power, or it may occur in a way that would be inconsistent with the repetitive, or potentially repetitive, nature of bullying. Bullying and discriminatory harassment may overlap, however, when the behavior is based on race, national origin, ethnicity, sex, age, disability, or religion. In such instances the behaviors may be covered under federal civil rights laws. The U.S. Department of Education Office for Civil Rights cautions that “by limiting their responses to a specific application of an anti-bullying or other disciplinary policy, [schools] may fail to properly consider whether the student misconduct also results in discrimination in violation of students’ federal civil rights” (Ali, 2010, p. 1).

With student behaviors being entered into the West Virginia Education Information System (WVEIS) under the legislative definition provided in §18-2C, however, it is currently not possible to discern bullying from harassment, or either one from behaviors that otherwise may be intimidating. They are treated in aggregate.

Method

Since the enactment of the current WV Code §18-2C, the West Virginia Board of Education (WVBE) revised its policy regarding student conduct. The result, Expected Behaviors in Safe and Supportive Schools (WVBE Policy 4373), among other things, describes the behaviors (dispositions) expected of West Virginia’s students, the rights and responsibilities of students, a framework for policy implementation, and descriptions of and corresponding potential interventions and consequences for inappropriate behaviors. The policy, which became effective July 1, 2012, also sought to bring the recording of harassment, intimidation, or bullying behaviors at the school level into alignment with §18-2C (see Appendix A. WV Board of Education Policy 4373, page 13). In the context of managing student discipline in West Virginia’s school system, harassment, intimidation, or bullying are included with a category of behaviors considered imminently dangerous, illegal, and/or aggressive in nature, and described as “willfully committed and known to be illegal and/or harmful to people and/or property” (WVBE Policy 4373, p. 49).
Concurrently, the West Virginia Department of Education (WVDE) initiated a redesign of the WVEIS discipline module to enhance schools’ capacity to record discipline incidents and use data for discipline management purposes. This new module, referred to as a discipline management system (DMS), was piloted in a small number of schools during the final months of the 2011–2012 school year. The 2012–2013 school year served as a transition period during which districts and schools were provided professional development opportunities to increase their capacity to use the system effectively. The new discipline reporting system was scaled to full statewide implementation during the 2013–2014 school year.

Discipline referral (DR) data related to the occurrence of and corresponding interventions and consequences for harassment, intimidation, or bullying behaviors used in this report were extracted from WVEIS. We attempted to extract DR data in a way that, to the extent possible, was consistent with the legislative definition provided above. Our analyses consisted of determining the frequency and prevalence rate (i.e., occurrence expressed as a percentage of second-month school enrollment figures) of harassment, intimidation, or bullying behaviors. We also examined and described the grade and demographic characteristics of students reported for these behaviors.

Limitations

The findings of this report are dependent on the completeness and accuracy of data submitted by schools and subsequently certified as accurate by districts. However, we detected substantial evidence of nonreporting and underreporting of discipline data among a substantial number of schools (Whisman, 2015a). Furthermore, DRs are reported into the WVEIS at the discretion of local school staff. Although the WVBE prescribed a coding scheme with corresponding behavior descriptions in Policy 4373, it is still subject to variation in interpretation and usage among the nearly 700 schools in 55 districts around the state.

Findings

Discipline Referrals

Overall, there were 246,571 DRs entered for all types of inappropriate behavior. The DMS allows for identification of students involved in incidents as nonoffenders or targets. This feature was included in the system to allow identification of students who were targeted by those engaged in inappropriate behaviors as an aid in the detection of bullying or harassment-type offenses. During 2015-2016 schools entered 5,008 DRs into the WVEIS for which a nonoffending student was identified. These DRs were omitted from this analysis. Additionally, because it is unclear the extent to which Institutional Programs and the West Virginia Schools for the Deaf and the Blind—identified in West Virginia as distinct school districts—use the WVEIS for reporting discipline behavior, we also omitted from our analysis the few DRs entered by these districts. After removing DRs in these categories, 240,387 DRs remained for analysis.

This report, however, focuses on DRs specific to harassment, intimidation, or bullying. During the 2015-2016 school year, 3,507 DRs (1.5% of the total) were reported for these specific behaviors statewide, committed by 2,936 students. The vast majority of those students (2,523 or
86%) were reported for a single offense, while the remaining 413 students (14%) were reported for two or more offenses (Table 1).

As noted earlier, the mandate set forth in WV Code §18-2C requires the reporting of the reasons, if known, for harassment, intimidation, or bullying behaviors. Of the 3,507 referrals for these behaviors, the reason indicated for 2,139 (61%) was some “other characteristic,” suggesting the reason was something other than the categories described in WVBE Policy 4373, or was not definitely known (Table 2). Other frequent reasons were physical appearance (10.1%), gender (6%), mental/physical/developmental/sensory disability (6%), or sexual orientation (5.5%).

Although the findings reported in Table 2 provide insight into reasons for the offenders’ behaviors, it is uncertain the number that may overlap with discriminatory harassment covered under federal civil rights laws. To gain a more detailed and relevant accounting in this regard, however, it would be necessary to collect contextual information about the specific incidents to make precise determinations of the reasons for harassment, intimidation, or bullying behaviors. This would best be done through qualitative means at the site and time of the incidents.
Students referred for harassment, intimidation, or bullying behaviors engaged in other inappropriate behaviors. Cross-tabulating the frequency with which students were referred for harassment, intimidation, or bullying against referrals for other major categories of behaviors revealed they were referred most frequently for two categories: disruptive/disrespectful conduct (50%) and failure to obey rules/authority (27%; Table 3). They also were reported for attendance-related issues (11%) and for aggressive behaviors (10%).

1 Overall values represent weighted averages rather than arithmetic averages of the percentages shown for each category of other behaviors.

The distribution of DRs for harassment, intimidation, or bullying behaviors across school program level indicates that the largest fraction (47%) were reported at the middle school level (Table 4). At this level, 8th graders ranked highest, accounting for about 18% of all harassment, intimidation, or bullying referrals (Figure 1). Students in 6th and 7th grades combined accounted for about 29%.

Students at the adolescent (high school) program level accounted for 32% of all harassment, intimidation, or bullying referrals, with the highest numbers reported for 9th graders. Students at the early learning (elementary) program level accounted for 20% of referrals, with the highest numbers among 5th graders, then trailing off rapidly at lower grades.

Descriptive statistics for the frequency, percentage, and rate of harassment, intimidation, or bullying DRs among counties are shown in Table 5. On average there were about 65 referrals for these behaviors per county, but there was substantial variability as indicated by the wide ranges in the minimum and maximum values shown (1 to 445). On average, referrals for harassment, intimidation, or bullying made up about 2% of all behaviors reported district-wide, but the range was from less than 1% to nearly 13%. Similarly, on average there were 13 harassment, intimidation, or bullying DRs per 1,000 students among counties, but it ranged from less than 1 to 42 per 1,000 (Table 5).

Student Demographic Characteristics

Nearly three quarters of students receiving a DR for harassment, intimidation, or bullying behaviors in the 2015-2016 school year were male. The characteristics of students referred, for the most part, followed the racial representation of the statewide student population, although some
variation was observed (Table 6). White students were present at a slightly lower rate than their respective statewide representation (85% vs. 91%), while Black students were present at a higher rate (11% vs. 4%). Other races were present in roughly the same proportions as their representation in the overall student population.

</tr>
</tbody>
</table>

Of the 2,936 students for which harassment, intimidation, or bullying DRs were recorded in the WVEIS, 784 (27%) were at the time of referral identified as eligible for special education services. This rate is disproportionate, given that about 16% of all students in West Virginia were eligible for special education services during the 2015-2016 school year. Similarly, when looking at the 3,507 total DRs for harassment, intimidation, or bullying reported into the WVEIS, this group of students accounted for 947 (27%) of them.

**Subgroup risk of referral for harassment, intimidation, or bullying behaviors**

The findings reported above indicate that students from selected subgroups were referred for harassment, intimidation, or bullying in proportions inconsistent with respective subgroup representation in the student population as a whole. To understand the magnitude of potential disparities, risk ratios were calculated following the methodology described by the National Clearinghouse on Supportive School Discipline (NCSSD, 2013). Risk ratios indicate the likelihood members of a subgroup will be represented compared to members of a referent group. In our analysis, risk ratios were calculated for students representing racial/ethnic minority groups relative to White students. We also calculated risk ratios for students with disabilities relative to students with no disabilities. Ratios were rounded to the nearest 0.5.

Risk ratios for the referent group, in our case White students and students with no disabilities, respectively, are by default equal to 1.0. Subgroup ratios at or below 1.0 indicate risk equal to or less than that of the referent group. Values exceeding 1.0 indicate greater risk.

During the 2015-2016 school year students of the Multiple or Other race categories, and Hispanic students, were at less or no greater risk for receiving DRs for harassment, intimidation, or bullying behaviors compared to White students (Table 7). Black students were 2.5 times more risk to be referred for these behaviors. Similarly, students with disabilities appeared to experience twice the risk for being referred for harassment, intimidation, or bullying compared to students with no disabilities (Table 7).

### Disciplinary Actions

Under definitions provided in *Expected Behaviors in Safe and Supportive Schools* (WVBE Policy 4373) and reflected in the DMS application in WVEIS, the number and type of interventions or consequences districts and schools may report were substantially expanded to accommodate more than 40 identifiable actions. These actions were grouped into 15 categories ranging from *no action warranted* to the most severe of consequences, *expulsion* from school. A large majority of the interventions or consequences used by schools, about 53% combined, were *out-of-school suspensions* or *in-school suspensions* (35%, and 19%, respectively). *Detentions* (11%) and *administrator/teacher and student conferences* (11%) were the next most frequently used intervention or consequence, followed by *warnings* (10%), *parent involvement* (6%) and *loss of privileges* (3%). All other interventions and consequences were used very infrequently (Figure 2).

![Figure 2. Interventions and Consequences Used by Schools in Response to Discipline Referrals for Harassment, Intimidation, or Bullying Behaviors.](image)

1 A vetting process is in place to accommodate additional interventions or consequences suggested by districts or schools.
Summary of Findings

The 2015-2016 school year was the fourth full year during which all districts and schools were required to report discipline behaviors via the newly developed DMS. Overall there were 246,571 DRs entered into the WVEIS in the 2015-2016 school year for any type of inappropriate student behaviors. Of them, 240,387 were considered valid reports for purposes of this report. Of the total number of DRs in WVEIS, 3,507 (1.5%) were for harassment, intimidation, or bullying behaviors.

The following are key findings from a descriptive analysis of harassment, intimidation, or bullying student behaviors reported during the 2015-2016 school year:

Analysis of referrals

- **Reasons for referrals.** WV Code §18-2C-3 calls on school districts to report, when known, the reasons for harassment, intimidation, or bullying behaviors. In the 2015-2016 school year, by far the most frequently reported reason was generically identified as some "other characteristic" (61%). The remaining reasons indicated were physical appearance (10%), gender (6%), sexual orientation (5.5%), mental/physical/developmental/sensory disability (6%), or race (5%). All other reasons were reported at lower rates.

- **Referrals by program and grade levels.** Most student DRs reported for harassment, intimidation, or bullying behaviors were at the middle school level (47%), followed by high schools (32%) and elementary schools (20%). By grade level, 8th graders accounted for 18% of referrals for harassment, intimidation, or bullying, followed by 6th, 7th, and 9th graders (about 14% to 15% each), 10th graders (10%), and 5th graders (8%). All other grades were represented at lower rates.

- **Other categories of referrals.** Students referred for harassment, intimidation, or bullying behaviors also were referred for other categories of inappropriate behaviors. In decreasing order, these categories were disruptive/disrespectful conduct (50%), failure to obey rules/authority (27%), tardiness or truancy (11%), and aggressive conduct (10%).

- **Disciplinary actions.** Disciplinary interventions or consequences used by schools in response to harassment, intimidation, or bullying behaviors included out-of-school suspensions (35%), followed by in-school suspensions (19%), detentions (11%), and administrator/teacher and student conferences (11%). All other interventions or consequences were used at lower rates.

Analysis of students referred

- **Number and gender of students.** A total of 2,936 students were referred for disciplinary action for harassment, intimidation, or bullying behaviors, most of whom (86%) were referred for a single offense. Nearly three quarters (75%) of the students referred for these behaviors were male.

- **Race/ethnicity of students.** White students were present at a slightly lower rate than their respective statewide representation (85% vs. 91%), while Black students were present at higher rates than their respective statewide representation (11% vs. 4%). Other races
and ethnic groups were present in roughly the same proportions as their representation in the overall student population.

- **Disability status of students.** More than a quarter (27%) of the students referred for harassment, intimidation, or bullying behaviors were identified as eligible for special education services at the time of referral. Students with disabilities, however, represent only 16% of the statewide student population.

- **Risk of being referred by race/ethnicity and disability status.** Risk ratio calculations indicate Black students to be 2.5 times more likely to experience DRs for harassment, intimidation, or bullying behaviors compared to White students. Similarly, students with disabilities were two times more likely to be referred for these behaviors than were students without disabilities.

---

**Discussion**

As noted earlier, the West Virginia Board of Education (WVBE) put forth a multicomponent framework for implementation of Policy 4373 to be followed by districts and schools (Figure 3). The intent of the framework and corresponding implementation plans, as stated in policy, is as follows:

Plans for the implementation of county policies for Expected Behaviors in Safe and Supportive Schools should be included within individual school strategic plans. The implementation plan shall reflect the particular needs of students and staff to study, learn and work in a positive school climate/culture. To the maximum extent possible, the plan should be developed collaboratively with input from all stakeholders including, but not limited to parents, business leaders, community organizations and state and local agencies. The plan should articulate and incorporate the partnership supports and resources that are available to the school through the county’s formal and informal partnership agreements as well as through additional school level partnerships (Expected Behaviors in Safe and Supportive Schools, WVBE Policy 4373, p.37).

More specific to the behaviors of interest in this report, in fall of 2012 the WVDE unveiled *It Does Matter*, an online clearinghouse for the dissemination of policy information and other content and resources aimed at building the capacity of the state school system to prevent, or otherwise identify and appropriately respond to harassment, intimidation, or bullying behaviors among West Virginia’s youth (see [http://wvde.state.wv.us/it-does-matter/](http://wvde.state.wv.us/it-does-matter/)).

---

**Suggested Best Practices**

This report is the fourth in a series of annual reports on this topic in accordance with WV Code § 18-2C-3, Harassment, Intimidation or Bullying Prohibition. Based on finding in previous annual reports (see Whisman 2014, Whisman 2015b, and Whisman 2015c) and a review of related literature, and in consideration of the fact that our findings for the 2015-2016 school year were similar to those of previous years, four suggested best practices provided continue to apply:
1. Address harassment, intimidation, or bullying behaviors using evidence-based interventions integrated into a whole-school approach aimed at improving all behaviors and overall conditions for learning school-wide.

2. Build staff capacity in districts and schools to provide appropriate behavioral interventions in the context of the multi-tiered framework, and integrate such a framework as part of a school-wide approach to promote appropriate behavior.

3. Minimize the use of out-of-school suspensions and couple in-school suspensions with meaningful interventions so that students are not deprived of needed supports.

4. Investigate in more detail the issue of subgroup disparity in discipline practices, and develop and deliver professional development and technical assistance to schools specific to minimizing disparities.

Appendix A. WV Board of Education
Policy 4373 Definitions

Harassment, Intimidation, or Bullying

A student will not bully/intimidate/harass another student. According to WV Code §18-2C-2, “harassment, intimidation, or bullying” means any intentional gesture, or any intentional electronic, written, verbal or physical act, communication, transmission or threat that:

- A reasonable person under the circumstances should know will have the effect of harming a student, damaging a student’s property, placing a student in reasonable fear of harm to his or her person, and/or placing a student in reasonable fear of damage to his or her property;
- Is sufficiently severe, persistent or pervasive that it creates an intimidating, threatening or emotionally abusive educational environment for a student; or
- Disrupts or interferes with the orderly operation of the school

An electronic act, communication, transmission or threat includes but is not limited to one which is administered via telephone, wireless phone, computer, pager or any electronic or wireless device whatsoever, and includes but is not limited to transmission of any image or voice, email or text message using any such device

Acts of harassment, intimidation, or bullying that are reasonably perceived as being motivated by any actual or perceived differentiating characteristic, or by association with a person who has or is perceived to have one or more of these characteristics, shall be reported using the following list: race; color; religion; ancestry; national origin; gender; socioeconomic status; academic status; gender identity or expression; physical appearance; sexual orientation; mental/physical/developmental/sensory disability; or other characteristic

When harassment, intimidation, or bullying are of a racial, sexual and/or religious/ethnic nature, the above definition applies to all cases regardless of whether they involve students, staff or the public. Detailed definitions related to inappropriate behavior of this nature are as follows:

- **Sexual harassment** consists of sexual advances, requests for sexual favors, sexually motivated physical conduct or other verbal or physical conduct or communication of a sexual nature when:
  - Submission to the conduct or communication is made a term or condition, either explicitly or implicitly, of obtaining or retaining employment, or of obtaining an education; or
  - Submission to or rejection of that conduct or communication by an individual is used as a factor in decisions affecting that individual's employment or education; or that conduct or communication has the purpose or effect of substantially or unreasonably interfering with an individual's employment or education; or
  - Creating an intimidating, hostile or offensive employment or educational environment

- **Amorous relationships** between county board employees and students are prohibited

- **Sexual harassment** may include but is not limited to:
  - Verbal harassment of a sexual nature or abuse;
  - Pressure for sexual activity;
  - Inappropriate or unwelcome patting, pinching or physical contact;
  - Sexual behavior or words, including demands for sexual favors, accompanied by implied or overt threats and/or promises concerning an individual's employment or educational status;
  - Behavior, verbal or written words or symbols directed at an individual because of gender; or
  - The use of authority to emphasize the sexuality of a student in a manner that prevents or impairs that student's full enjoyment of educational benefits, climate/culture or opportunities
Appendix A.

- **Racial harassment** consists of physical, verbal or written conduct relating to an individual's race when the conduct:
  - Has the purpose or effect of creating an intimidating, hostile or offensive working or academic environment;
  - Has the purpose or effect of substantially or unreasonably interfering with an individual's work or academic performance; or
  - Otherwise adversely affects an individual's employment or academic opportunities

- **Religious/ethnic harassment** consists of physical, verbal or written conduct which is related to an individual's religion or ethnic background when the conduct:
  - Has the purpose or effect of creating an intimidating, hostile or offensive working or academic environment;
  - Has the purpose or effect of substantially or unreasonably interfering with an individual's work or academic performance; or
  - Otherwise adversely affects an individual's employment or academic opportunities

- **Sexual violence** is a physical act of aggression or force or the threat thereof which involves the touching of another's intimate parts, or forcing a person to touch any person's intimate parts. Intimate parts include the primary genital area, groin, inner thigh, buttocks or breast, as well as the clothing covering these areas. Sexual violence may include, but is not limited to:
  - Touching, patting, grabbing or pinching another person's intimate parts, whether that person is of the same sex or the opposite sex;
  - Coercing, forcing or attempting to coerce or force the touching of anyone's intimate parts;
  - Coercing, forcing or attempting to coerce or force sexual intercourse or a sexual act on another; or
  - Threatening to force or coerce sexual acts, including the touching of intimate parts or intercourse, on another
  - Threatening or forcing exposure of intimate apparel or body parts by removal of clothing

- **Racial violence** is a physical act of aggression or assault upon another because of, or in a manner reasonably related to, race

- **Religious/ethnic violence** is a physical act of aggression or assault upon another because of, or in a manner reasonably related to, religion or ethnicity.
