

Implementation Support Resource Bank

The Implementation Support Resource Bank provides modules, information briefs, publications, and websites to support local education agencies (LEAs) across the state of West Virginia to implement effective practices with fidelity.

IRIS Center: Evidence-Based Practices - Selection, Implementation, and Evaluation of EBPs

Description:

This three-part module, developed by the IRIS Center provides asynchronous professional development for educators to understand how to select, implement, and evaluate evidence-based practices to improve outcomes for students.

Related Resources:

Evidence-Based Practices (Part 1): Identifying and Selecting a Practice or Program

In this module, participants learn what an evidence-based practice or program (EBP) is; how to select EBPs from trustworthy sources; how to match an EBP to your resources or student needs; and how to evaluate the research on a practice or program (estimated time - 1.5 hours).

https://iris.peabody.vanderbilt.edu/module/ebp_01/#content

Evidence-Based Practices (Part 2): Implementing a Practice or Program with Fidelity

Participants will learn the importance of implementing an EBP with fidelity; become familiar with key components required to achieve fidelity of implementation; recognize the importance of gathering and organizing the resources necessary for effective implementation (estimated time - 1 hour).

https://iris.peabody.vanderbilt.edu/module/ebp_02/#content

Evidence-Based Practices (Part 3): Evaluating Learner Outcomes and Fidelity

In this module, participants will learn how to monitor and evaluate child or student progress and fidelity of implementation; and understand how to examine the relationship between student outcomes and fidelity of implementation to make decisions regarding an EBP (estimated time - 2 hours).

National Implementation Research Network

Description:

The National Implementation Research Network offers free, online learning materials for use by any stakeholder involved in active implementation and scaling up of programs and innovations. The site goal is to increase the knowledge and improve the performance of persons engaged in actively implementing any program or practice using the principles of implementation science.

Related Resources:

Active Implementation Practice and Science Brief

This research brief provides an overview of the Active Implementation Frameworks.

NIRN Active Implementation Hub

The Active Implementation Hub has been developed with assistance from the U.S. Department of Education to assist individuals and organizations with developing their understanding of Active Implementation Frameworks through modules, short courses, and a resource library. Active Implementation provides a framework that assists an organization in responding to all factors required to successfully implement an action or change.

<https://nirn.fpg.unc.edu/ai-hub>

Module 1: An Overview of Active Implementation Frameworks

In this module from the Active Implementation Hub, you will learn about the five Active Implementation Frameworks and how to begin applying them in your setting.

Implementation Research: A Synthesis of Literature (2005)

This resource is the seminal work of the National Implementation Research Network, published in January 2005. This monograph summarizes findings from the review of the research literature on implementation and proposes frameworks for understanding effective implementation processes. The results of this literature review and synthesis confirm that systematic implementation practices are essential to any national attempt to use the products of science - such as evidence-based programs - to improve the lives of its citizens.

State Implementation and Scale-up of Evidence-Based Practices (SISEP) Center

Description:

The State Implementation and Scaling-up of Evidence-based Practices (SISEP) Center is a national technical assistance center funded by the U.S. Department of Education's Office of Special Education Programs. The SISEP Center, a project within the National Implementation Research Network (NIRN), is housed within the FPG Child Development Institute at the University of North Carolina at Chapel Hill.

Related Resources:

State Implementation and Scaling-up of Evidence-based Practices (SISEP) Center Website

The SISEP website provides current news and blogs related to implementation practices, resources and tools, as well as links to some of the most popular resources out of the Active Implementation Hub (AI Hub).

<https://sisep.fpg.unc.edu/>

SISEP Center Tools & Resources

SISEP produces short educational briefs on topics or issues to use as a communication tool and learning resource within professional learning activities. SISEP also creates white papers to illustrate implementation work through case studies and other data stories. This site also includes a link to some of SISEP's most popular implementation tools.
