Governor's  
STEM Institute

**For Current  
8th Graders**

## GREEN BANK OBSERVATORY | JULY 7-20, 2024

Investigate the Universe as you study the mysteries of outer space utilizing data from the Green Bank Observatory in Pocahontas County. Accessing the information under the guidance of nationally recognized scientists and instructors, students will learn about planets, the Milky Way, black holes, distant galaxies and, perhaps just as importantly, about their inner selves.

*For deadlines and advice, see your school counselor today!*
