

## CHAIN OF INFECTION

### Rubric

1. Pull a stick or card with a causative agent
2. Name your causative agent: (like *TacoBellicus Diarrheaus*)
3. Choose your reservoir: (person, place, water, dirt, BE CREATIVE)
4. Decide how your causative agent gets from the reservoir into the host

Causative agent: (give it a name)

Reservoir:

Portal of exit: (you decide)

Mode of transmission:(you decide)

Portal of entry:(you decide)

Host: ( animal? Human? insect?)

5. What must be done to stop the spread of your neurological disease? Can you prevent it in the future?
6. Write a 2-paragraph story about your Neurological Virus Outbreak
7. Create an illustration of what your infected individual looks like and how they behave.
8. Create a Chain of Infection and describe what you can do in each area to prevent the outbreak.
9. Is there anyone in your group who did not contribute to the group?
10. Post or present the illustration of your infected individual and attach or paste the story on the back.
