

2022 West Virginia Statewide Summative Assessment Results

West Virginia DEPARTMENT OF
EDUCATION

2022 West Virginia Assessment Results

The 2022 state summative assessment results consist of combined student performance across all the state's summative assessments, including the West Virginia General Summative Assessment (WVGSA) in grades 3-8, the SAT School Day in grade 11, and the West Virginia Alternate Summative Assessment (WVASA) in grades 3-8 and 11. Results are based on the performance of students who are enrolled for a full academic year, meaning they were enrolled for at least 135 days during the school year.

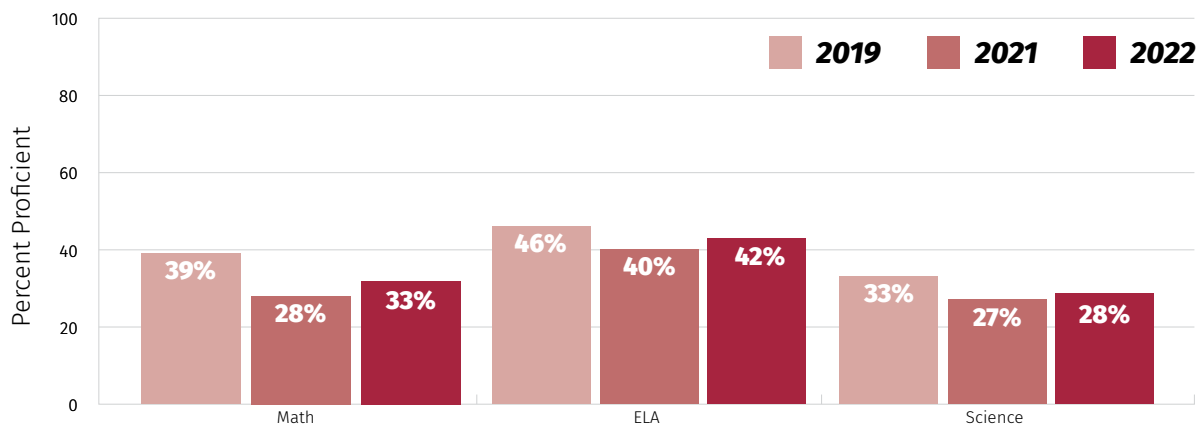

The 2022 assessment results are an important tool as the WVDE addresses student learning and ongoing recovery from the COVID-19 pandemic.

Important Points to Consider

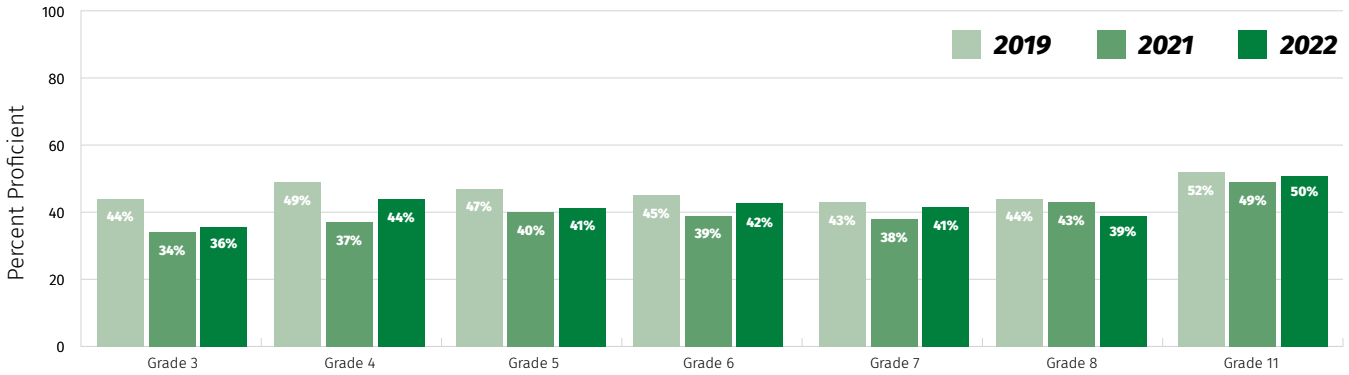

- » West Virginia successfully administered statewide assessments to more than 95% of students in Grades 3-8 and 11.
- » Comparison of 2022 results to 2021 results shows signs that recovery from the COVID-19 pandemic has started.
- » West Virginia did not administer statewide summative assessments in 2020.

Frequently Asked Questions about West Virginia's 2022 Statewide Assessments

Why are students required to take statewide assessments?

- » West Virginia is required by federal and state law to administer annual statewide assessments. West Virginia's statewide assessments – which include the West Virginia General Summative Assessment in grades 3-8, the SAT School Day in grade 11, and the West Virginia Alternate Summative Assessment in grades 3-8 and 11 – provide critical information about individual student performance and about where West Virginia needs to better support students, teachers, and schools across our state. Our goal is to use the results to create a stronger and more equitable education system.

What was the state's student participation in statewide assessments in spring 2022?

- » Participation in statewide assessments in 2022 returned to pre-pandemic levels. Statewide participation in grades 3-8 was above the 95 percent required by the federal government, and participation in grade 11 was 94 percent. Assessment participation, however, may have varied across districts and schools.

How will the state, district and school leaders, and educators use the assessment results?

- » Assessment results are just one of several strategies used to evaluate student achievement and create a stronger education system. Districts and schools in West Virginia are using the information gained from the assessment to strive for continuous improvement and to continue to address student recovery.

How should parents use the assessment results to support their children?

- » The summative test score is one of many measures used to identify achievement gaps. We encourage parents to consider their child's results within the context of their learning environment. Parents will receive an individual student report, as well as a video score report, that will detail a student's performance along with summary information about aggregate performance at the school, district, and state levels. The results can provide a helpful information regarding where their child is excelling as well as where the student may need more support.

Where can I view the assessment results?
