

West Virginia Governor's Computer Science Institute

Discover the Power of
**Problem-solving, Coding,
and Computational Thinking!**

West Virginia University
July 6-12, 2025

Unleash your potential in the exciting world of Computer Science!

This institute is designed for 9th and 10th graders of all skill levels, from those just starting out, to those with some prior experience. You will:

- **Master essential computer science skills:** Through focused training and practical exercises.
- **Collaborate and innovate:** Work with peers to bring your project ideas to life.
- **Develop a portfolio-worthy project:** Showcase your skills and creativity.

Who should attend?

- Students interested in technology, problem-solving, and creativity.
- No prior coding experience necessary!

What you'll gain:

- Connections to and friendships with other like-minded students.
- Hands-on experience with real-world applications.
- Improved problem-solving and critical thinking skills to carry forward in Computer Science and other fields.

**READY TO LEVEL UP?
WE CAN'T WAIT TO SEE
WHAT YOU CREATE!**
